

Online Retail Sales: Exploratory Data Analysis

What drives sales, and where to act

MOHAMED RIDUVAN AZBER

DATA ANALYSIS

1,000 orders, cleaned and ready

737K

Total sales

737

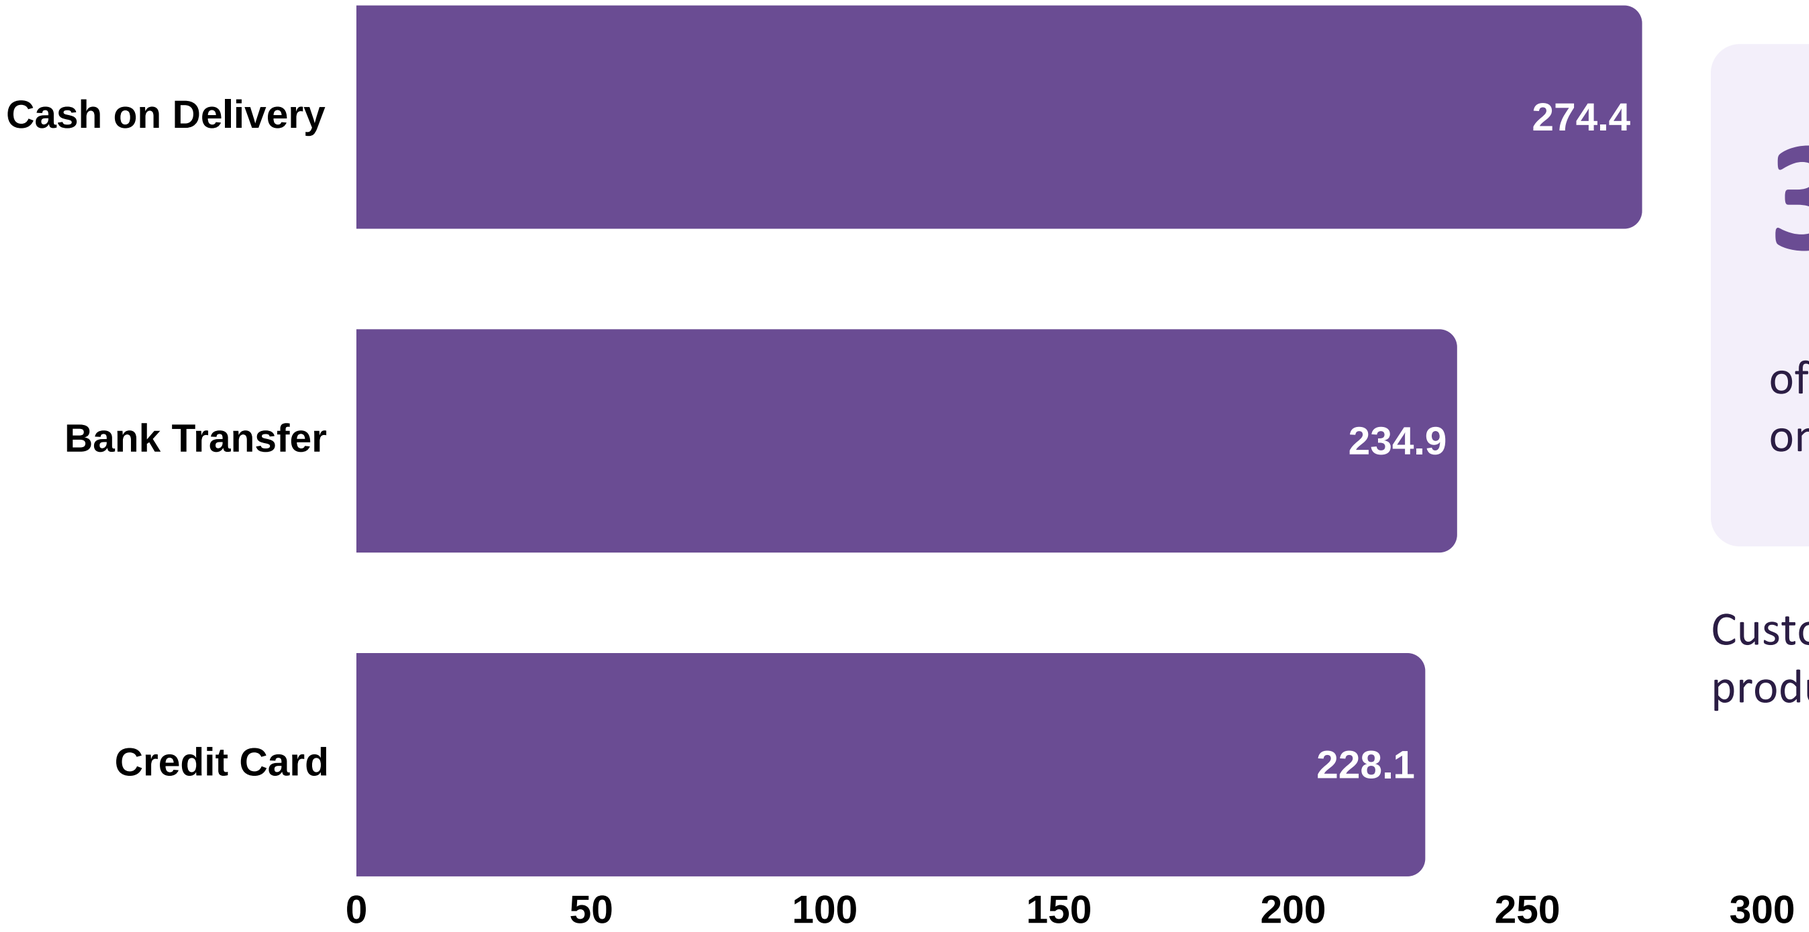

Average order value

3.99

Average review score

1. Order date converted to datetime
2. Duplicates checked: none found
3. Missing review scores filled with the mean
4. Missing gender values filled

Cash on Delivery leads sales

37%

of total sales come from Cash on Delivery

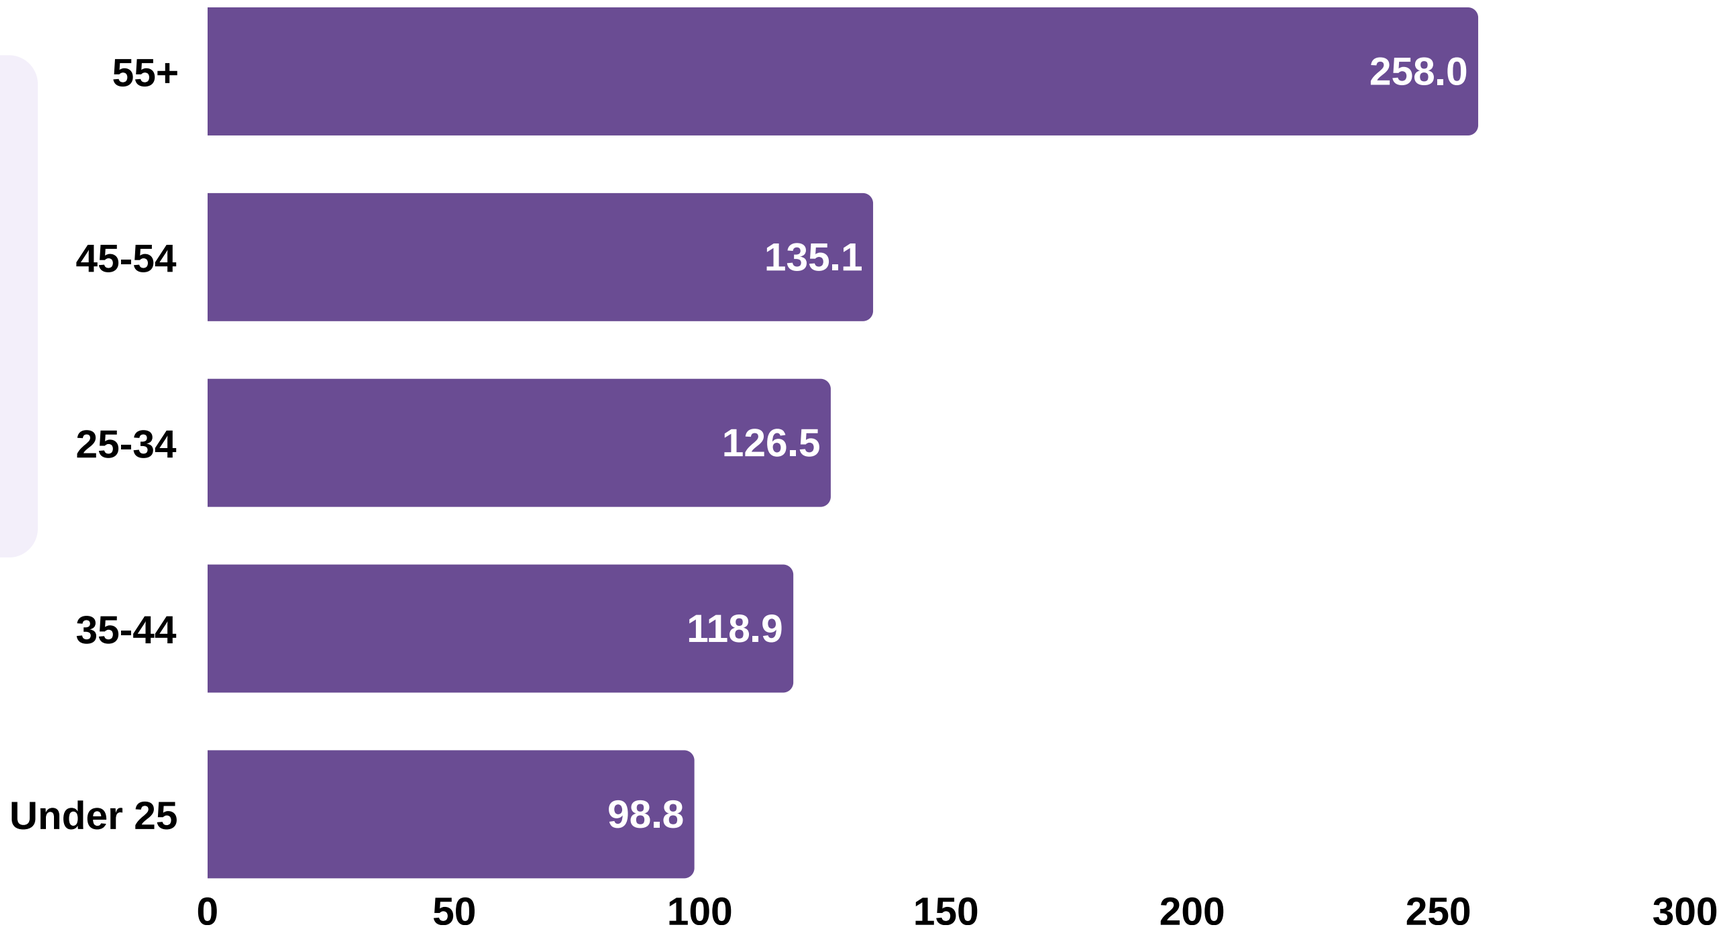

Customers prefer paying when the product arrives.

Customers aged 55+ spend the most

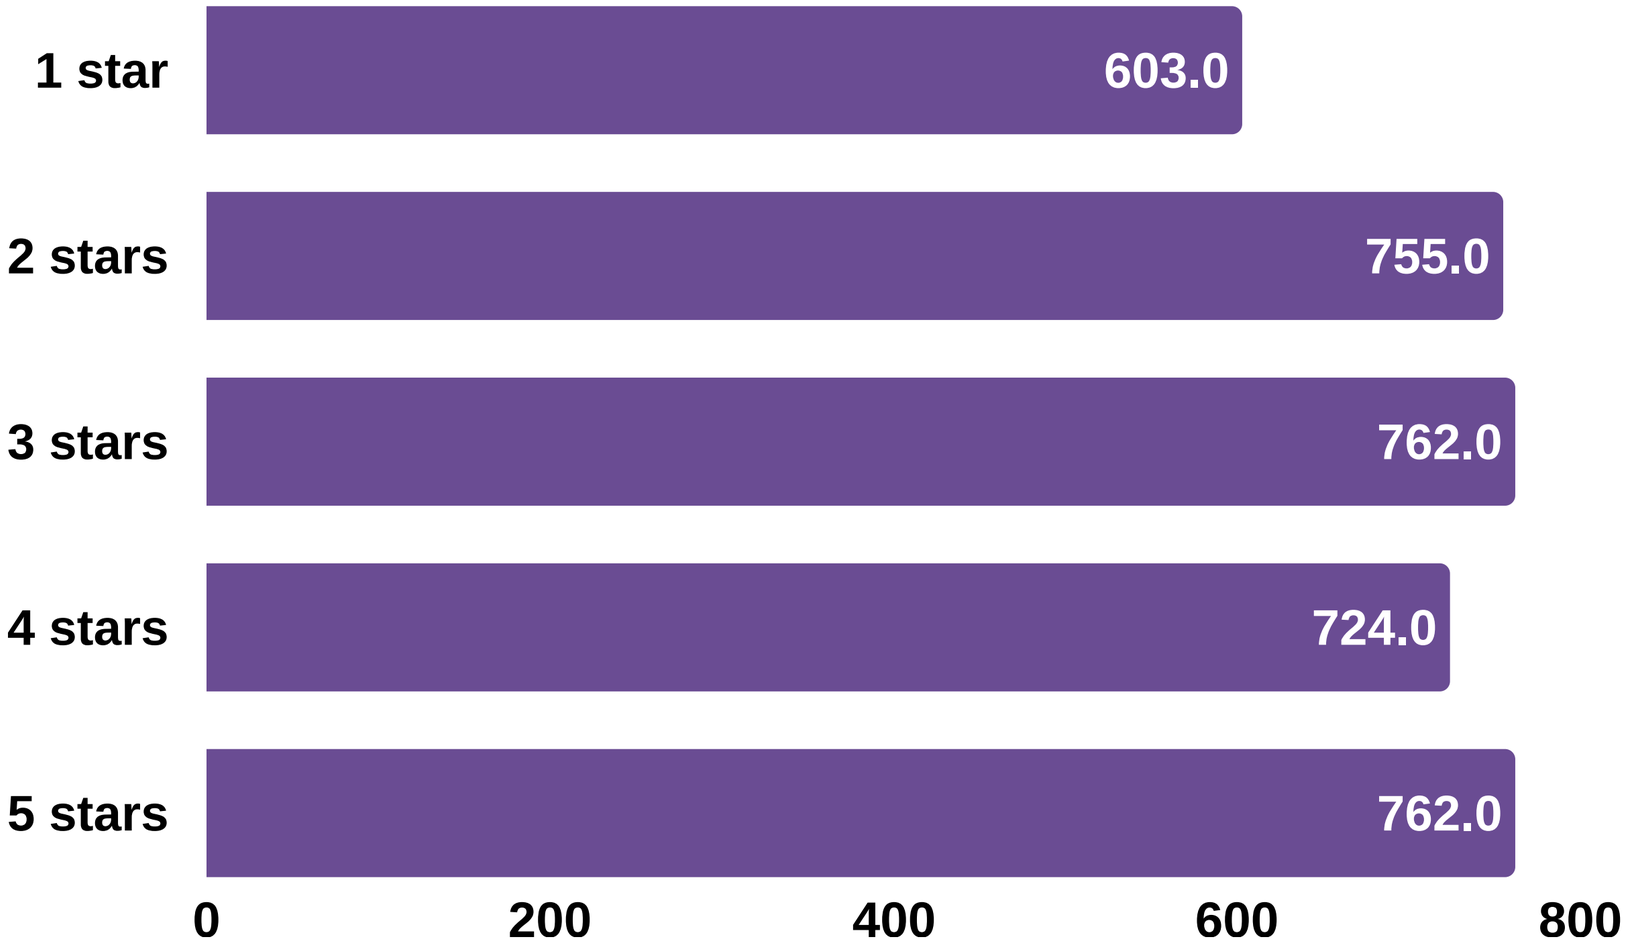

35%

of revenue comes from customers aged 55+

The 55+ group covers a wider age range than the others.

1-star customers spend the least

603

average order for 1-star customers

Other scores average 724 to 762. Look into what causes 1-star reviews.

Sales peak in August and on Fridays

August

Peak month for sales

Friday

Peak weekday for sales

~2%

of revenue from the top 5 cities combined

Plan promotions and stock around the peaks. No single city dominates, so sales are spread widely.

Recommendations

- Run promotions in August and on Fridays
- Target the 55+ segment with tailored offers
- Keep Cash on Delivery and reward online payment
- Investigate the causes of 1-star reviews

THANK YOU!
